

Snowflake Self-Paced Course Content

Session -1

- Snowflake Overview
- Snowflake Certification
- How To Create A Snowflake Free Trial Account

Session -2

- Overview of Snowflake Dashboard

Session -3

- Snowflake Worksheet
- Different Connectors for Snowflake

Session -4

- Snowsql Snowflake
- Configuration
- Python Components
- Snowflake Connector for Python
- Installation

Session -5

- How to Access Snowflake Account
- Command Line Interface
- Creating Virtual Warehouse

Session -6

- Python Execution in Snowflake
- Snowflake Architecture & Access Control

Session -7

- Loading Using the Web Interface
- Loading Data into Snowflake
- File Formats

Session -8

- Accessing Cloud Storage Data into Snowflake
- GCP Lab Guide

- Internal And External Storages

Session -9

- GCS Data Load File Format
- Understanding Caches

Session -10

- Google Cloud Platform
- Storage OCP Service Account

Session-11

- Snowpro Core Certification
- Data Unloading Process
- Documentation on Data Unloading

Session-12

- Secure Data Sharing
- Sharing Data with Different Accounts
- Share Data from Multiple Db

Session-13

- Data Sharing No-Snowflake Consumers
- Create DB from Secure Share

Session-14

- Managing Reader Accounts
- Create Reader Account
- Importance of Reader Accounts

Session-15

- Access Reader Account
- Privileges in Data Sharing

Session-16

- Temporary and Transient Table
- Data Storage Usage for Temporary Tables
- Data Retention Period

Session-17

- Understanding and Usage Time Travel
- Security and Data Protection

Session-18

- Context Functions
- Enabling and Disabling Time Travel

Session-19

- Snowflake Cache Layers
- User and Roles In Snowflake
- Virtual Warehouse Privileges

Session-20

- Understanding Caches (Metadata, Result & Storage)

Session-21

- Virtual Warehouses Working In Snowflake
- Different Types Of Settings In Warehouses
- Multiclustor Warehouses

Session-22

- Multiclustor Users/Queries
- Querying Historical Data
- Auto-Scale
- Scaling Policy

Session-23

- Introduction to Tasks
- Simple Tree of Tasks
- Tasks Functions

Session-24

- Create Tasks
- Grant Execute Task Privileges
- Roles
- Alter Tasks

Session-25

- Schema Tasks
- Cloning Using Time Travel
- Scheduling As Per Time with Different Time Zones
- Stored Procedures

Session-26

- Overview Of Data loading
- Compute Resources
- Loading Using Snowpipe
- Introduction To Snowpipe
- Billing For Snowpipe Usage
- Continuous Data Loading

Session-27

- Creating Microsoft Azure Account
- Mock Tests for Snowflake

Session-28

- Practical Questions
